

DIDSBURY EZI-LIFT COVER LIFTERS

Didsbury EZI-LIFT manhole cover lifters provide a safe and easy-to-use method of lifting and moving covers. Incorporating two sets of rollers at the end of the lifter, the EZI-LIFT locates either directly or through adaptor bars to the manhole cover keyholes. The rollers serve as a fulcrum point when downward pressure is applied to the handle, lifting the cover with minimal effort to reduce the risk of back injury to the operators.

COMPANION MODEL

The Companion model with two fold down handles is used for one-man operations where keyhole positions allow the adaptor bar to be locked along the centreline of the manhole cover.

Gently push down on the handles to lift the cover

Slide the cover back on the Ezi-lift rollers

PART NO. 10/1415

FEATURES

- Two handed operation
- Handles fold down for compact storage
- Wide nylon rollers at fulcrum point provide excellent stability
- Variety of remote keys to lock adaptor bar to cover

DIMENSIONS:

Overall length: 1300mm
Length with handles folded: 800mm

WEIGHT:

12kgs

STANDARD MODEL

The standard model with rigid handles is normally used in pairs where the keyholes are offset from the centreline (Elkington Gatic Covers). The lifter fits directly into the cover with no need for an adaptor bar or keys.

Use the EZI-LIFT inverted to break the seal of tight covers

Gently pull back the EZI-LIFT's to raise one edge of the cover

Slide back the cover on the EZI-LIFT rollers

PART NO. 10/1376

FEATURES

- Lightweight for easy deployment and convenient storage
- Stable and easy to manoeuvre
- Heel protection on lifter gives extra leverage to loosen tight or frozen covers prior to lifting
- Lifts all Elkington Gatic Covers

DIMENSIONS:

Overall length: 1200mm

WEIGHT:

7kgs
