## CEBORA 215AMP GAS/GASLESS MIG WELDER W/ EURO

The Apollo 215 is a heavy-duty singlephase machine, ideal for the busy workshop, farm or medium engineering workshop.

## Features include

- Spot and stich timing
- Cebora spool gun connectivity
- Fan cooled and features thermal overload protection.

This welder is supplied for gas shielded welding, and is supplied ready to use with an Argon/ArgonCO2 regulator, 3m Binzel Euroconnect torch, and a comprehensive easy to follow instruction manual are also supplied.

This machine can be converted to gasless welding but this requires an extra cost modification to the machine.

## Notes:

Use CO2 or Argon/CO2 for welding steel and Argon for Aluminium and Stainless Steel (Argon with 2% CO2 preferred). For welding with CO2 shielding gas order the machine with a CO2 regulator (W-GR102A) – no charge substitution.
