

Compact and easy to move. Its compact size, 94 cm length x 85 cm width, make MIX 120 the perfect solution when working in limited operating space. The support foot and large diameter wheels make it safe and easy to manoeuvre into position, even on sandy or wet surfaces.

- GRID WITH BLADES
SELECT THE DISCHARGE HEIGHT
Owing to extendible legs the work and the discharge height can be adjusted.

- ELECTRIC SAFETY DEVICE
Once the top grid is lifted, an electric limit switch stops the rotation of paddles.

- HEALTHY HEARING
MIX 120 is extremely quiet. The application of motorgearbox with gears in an oil bath cuts the noise level to only 68 dB(A) allowing the operator to work without noise levels that are harmful to health.

- MOTOR-GEARBOX IN AN OIL BATH

- QUICK AND UNIFORM MIX

Thanks to forced-duty planetary mixing system the batch time is reduced to minimum: mixing, 60 lt lean mortar requires some 40 sec.

- THERMIC-MAGNETIC SWITCH WITH INSULATION CLASS IP 55 MINIMUM -VOLTAGE COIL

- IP 67 PLUG
