For Evaluation Only.

Capacity 30-35 sq.m/h

Ideal for heavy duty carpet cleaning, the PREX 300 sprays, brushes and vacuums all in a single operation and can be used in both forward and reverse direction. The cleaning solution is sprayed into the carpeting under pressure through two sets of twin nozzles, dirt is brushed out of the pile thoroughly but gently by the brush, the powerful vacuum then recovers the cleaning solution together with the dirt, back into the cleaner's tank.

The 1250W turbine motor and 2.3 bar spray pressure makes short work of cleaning large areas.

A drain hose makes emptying the waste-water tank quick and easy.

All controls are conveniently mounted on the centre console in the operator's line of vision.

A swivel adaptor is provided for easy attachment of hand held tools and floor tools (available as optional accessories)
