

Bullfinch 1200HL - Superglow portable Calor Gas radiant heater

Item Description

The Bullfinch 1200HL Superglow portable Calor Gas radiant heater is designed to operate from a refillable Calor Gas Propane cylinder. It is ideal for use in workshops, farms or building sites.

The Bullfinch 1200HL Superglow portable Calor Gas radiant heater has a Super-stability wide frame with low centre of gravity makes it practically impossible to tip over accidentally. Its rugged and robust construction will allow it to survive the severe use it can often receive in certain environments.

The portability of Bullfinch 1200HL Superglow portable Calor Gas radiant heater and gas cylinder means that it can easily be moved from place to place – to provide instant heat in such environments as building sites, road works, outbuildings, workshops, farms, public utilities and for maintenance projects and emergency use.
