Millennium

The ultimate in car trailers

For over 20 years, we have prided ourselves in producing quality vehicle transporters for all kinds of uses—weather it be a basic fixed-bed unit or a fully enclosed transporter. With a design and safety standard the envy of the industry, our highly experienced team of design engineers will be happy to discuss your vehicle transporter special requirements.

Our highly successful Millennium transporters are of proven design for maximum efficiency, being strong yet light, the ideal choice for the professional use and transporting racing cars. Both models feature an all-integer chassis construction incorporating sides, fully enclosed mudguards and side protection sills which are more than strong enough to stand on, the chassis is fully welded together and then hot dip galvanised for the ultimate durability and protection.

Again like all trailers manufacture by PRG Trailers , the millennium fixed and tilt bed trailer all come complete with full European type approval to the latest EU legislations.
