

Lever Action Cable Reel Jack

The lever action reel jack is a quick and economical way to set up reels of strand or cable. This multi-purpose tool can be used on the ground, in the truck or on the warehouse floor. Constructed from heavy-wall square steel tubing, this labor saving tool will easily lift reels up to 54" diameter. The lever action reel jack features three (3) arbor positions for reels of varying diameters, welded steel construction and a powder coated finish.
