

Clarke CSW13T portable resistance welding machine is suitable for many spot welding applications including vehicle body repairs, general metal fabrication and light industrial use. Robust and simple to use, the CSW13T incorporates an automatic adjustable micro-processor controlled timer for consistent results, enabling the fast and efficient fusion of metal sheet.

- Welding capacity on mild steel 2mm + 2mm
- Input power supply 230v, 50hz
- Max. absorbed power 13kW
- Automatic adjustment of welding time & current according to the thickness of material chosen
- Continuous & pulsed operation settings
- Arm pressure adjustable from 40kg to 120kg (with 120mm long arm)
